MEDINOXX

Reduce: Modular System

Only use as many medication cups as your patients really need. Save cups and costs and avoid unnecessary plastic waste.

Reuse: Medi-Trays

Medinoxx is the first and only system that offers reusable trays and thus sustainably protects the environment. In comparison to similar blister systems, up to 95% of the plastic waste can be avoided within a period of 3 years.

Recycle: Medi-Cups

The Medi-cups are made from homogenous plastics and can easily be returned to the recycling cycle after use.
